Auto Pay: Automatically withdrawn each month from your bank account and into the city's account. Come into the office fill out the application and bring a blank check with you. It only takes a few minutes to get set up.

On-Line Bill Pay: You can do the transaction each month by yourself by going into one of our web pages (see above) clicking onto the link Orangeville On-Line Bill Pay and it will take you to the site to make the transaction. Any bills that have a problem and our returned will be charged the Return check fee of \$20

Mayor and Council News

A very special THANKS goes out to the Orangeville Days Celebration Committee for an outstanding celebration. We had a great turn out this year, thanks to all those who were involved. This is Sandra Huntington last year as chair over the celebration committee if you see her tell her thanks for years of service she has put in to making Orangeville Days a success.

A very special THANKS goes to the "Humphrey Next Generation" for putting on another great Lamb Fry Dinner. For Orangeville Days.

A reminder as you look at your utility bill this month you will notice your bill has gone up, this is due to the annual increase of 2% to cover the increasing cost in running the city.

"Bright Spot" are popping up in many yards, thanks goes out to all of you as you take pride in how your home and community look. Keep up the good work in making Orangeville a "Pretty Little Place."

Message from the Beautification Committee

"Share the Harvest"

Friday, September 6th

Meet at the City Park at 6:00pm

And bring a goody made from your garden produce
to share with others

A monthly spotlight on a citizen in our community

Citizen Spotlight: Jeff & Lynette Tuttle

Jeff and Lynette Tuttle have been married 31 years and of those 31 years they have lived in Orangeville City. They raised four children 2 girls and 2 boys. They have four grandchildren and one on the way and believe they are the greatest. Jeff is employed at Emery Water Conservancy District and Lynette is employed at Catapillar. They enjoy hunting, fishing, and trap shooting, camping and horse back riding.

Jeff served on the Orangeville City council for 12 years from January 2000 to December of 2011. He was over our roads and water. He helped develop and upgrade our curbs, gutters, sidewalks, water lines, and fix many of our drainage problems we had throughout the city. He was great council member. He formed many friendships over the years working with great individuals who are very dedicated to serving this community.

Jeff and Lynette believe Orangeville is the greatest place on earth to live and raise a family.

Thanks Jeff and Lynette for serving and continuing serving our little city and helping make Orangeville a great place to live, play, and raise a family.

55 Facts Figures & Follies of Water Conservation

Information from American Water Works Assoc. Printed in 1991. Most still apply today.

Water conservation is something we all should practice. It's too precious to waste. Here are some useful facts and simple suggestions that will help you understand more about water. They'll help you save hundreds, even thousands of gallons per month without any great inconvenience.

"continued from last month."

6. If everyone in the United States flushed the toilet just one less time per day, we could save a lake full of water about a mile long, a mile wide, and four feet deep every day.
7. Every glass of water brought to your table in a restaurant requires another two glasses of water to wash and rinse the glass. Since nearly 70 million meals are served every day in U.S. Restaurants, we'd save more than 26 million gallons of water if only one person in four declined the complimentary glassful.
8. If you have a lawn, chances are it's your biggest water gobbler. Typically, at least 50% of water consumed by households is used outdoors. Inside your house, bathroom facilities claim nearly 75% of the water used.
9. Indoor water use statistics vary from family to family and in various parts of the country. But they average out pretty reliable. Nearly 40% gets flushed down toilets, more than 30% is used in showers and baths, the laundry and dishwashing take about 15%, leaks claim 5% or more, which leaves about 10% for everything else.
10. How many times a day is the toilet flushed in your house? If U.S. citizens averaged only four or five flushes per day, it would amount to more than 5 billion gallons of water down the drain. That's enough to supply drinking water to the entire population of Chicago for more than 6 years.
11. Little leaks add up in a hurry. A faucet drip or invisible toilet leak that totals only two tablespoons a minute come to 15 gallons a day. That's 105 gallons a week and 5,460 wasted gallons of water year.

"Continue next month."

Calendar of Event

August

- | | |

| Sep 6 | "Share the Harvest" picnic |
| Sep 11-13 | City Office Closed – Meeting in SLC |
| Sep 17 | City Council – 7:30pm |

NOTICE:

On the 15th of July a letter was sent out to notify the residents of Orangeville of our critical water situation we need everyone to help in conserving water both culinary and secondary it all comes from the same source. Yes you do pay for the use of this water and feel you have the right to water and use water as you wish, just a little reminder if we have another bad winter like we have had for the last several years, it could come down to only having culinary water for your use next year. Please remind your neighbors when they are watering out of turn to conserve we all need to work together.

Schedule:

RESIDENTS LIVING:
